

Integration of the popular DIN40 toolholder into the 625X spindle housing delivers constant high speed with ultra low vibration and improves accuracy and rigidity. Rigid steel construction in one piece with the toolholder also cuts the height of the unit. Air Turbine Spindles™ patented double turbine's extra power the 0.9HP / 0.67KW maintaining stable high speed and torque under load the 625XDIN(40) accelerates feed rates and cuts cycle times. Rated governed speeds available are 30,000 rpm, 40,000 rpm and 50,000 rpm. Ideal for mold making, milling, finishing with small cutter capacities. Compact and reliable Air Turbine Spindles™ 625XDIN(40) unit delivers patented constant governed high speed operation under load cuts faster and cleaner - achieving major savings and a finer finished surface. Super precision at 0.0002" / 0.005mm. with H6 Shank Tolerance. X = Double Turbine Power.
