

The **660DIN40** is ideal for heavier duty applications and milling hard materials in corners. The **660** features higher governed constant speed at **50,000 rpm** and even higher power at **0.94 hp (0.70 kW)**. Our proprietary governor controlled turbine maintains rated high speed optimizing tool performance and life. Air Turbine Spindles® direct drive turbine operates with very low vibration and no heat in 24/7 operation. As a result the **660** mills faster in all materials, including tool steel, titanium and ceramics reducing cycle times dramatically. For long life milling in hard materials this robust **660 Series** is equipped with quadruple air cooled angular contact bearings.

Economical consumption of air results from our governor adjusting cfm air flow to the minimum required to maintain high speed. With 2μ precision in its Ultra Precision Collet ER 11 the **660** is also very precise. Selectable rear or side air feed on each spindle. Automatic Loading from the magazine on all machines.

Do not use couplings / hoses less than 1/4" / 6mm Internal Diameter (ID). Use couplings / hoses with a minimum ID of 6.5mm for 602, 602X and 625 spindles, a minimum ID of 8mm for 625X, 650, 660 spindles and (602, 602X, 625, 625X, 650 and 660 spindles with TMA) and a minimum ID of 10mm for 650X spindles and 650X spindles with TMA). Always use a 0.3 micron filter and/or extractor where required and check specified psi or l/s air flow. Use 90 psi / 6.2 Bar clean, dry, oil-free air only. Use eye protection and follow safety instructions. Supply is subject to Air Turbine Tools Inc. terms and conditions of sale and distributor policies in effect for the time being.
