310RDM - Router Hand Tool Series

Control and Power - to 0.88 hp. For high speed routing. Wood, plastics and fiberglass are cut faster and cleaner at governed 40,000 rpm with less fiber break-out with the **310RDM**.

Oil-free mechanism results in no oil misting and no part contamination. The **310RDM** with trigger switch control is a light powerful direct drive turbine with only 2 moving parts - resulting in great reliability. A further advantage of the **310RDM** is the tool's low vibration magnitude (just 0.38 mm/s²) and low heat – both improving operator comfort and reducing RSI risk.

Standard Equipment: Hand Tool, 1/4" or optional 6mm collet, collet wrenches, rear exhaust, exhaust deflector and trigger switch. Oil free 90 psi (6.2 bar), clean, dry air supply required.
